Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-3, 5-6, 9-11, 13-16, 18 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent NO.5681279 to Roper et al.

Roper teaches a syringe with a dispensing head for releasable holding a pill and a syringe component including a main barrel for contain a dose of water, a thumb operable plunger a tube in fluid communication with the other end of the main barrel and defined by at least one water release hole, a piston slidably mounted in the tube; whereupon the plunger said water urges the piston and pushed rod forward such that

Art Unit: 3763

rod ejects the pill from the dispensing head into the animal's mouth, and when the piston clears said at least one water release hole.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 4, 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent NO.5681279 to Roper et al.

As mentioned above Roper teaches the invention except for having multiple water holes. However it would have been obvious to have multiple water holes for multiple effects *In re Harza*, 274 F.2d 669, 671, 124 US PQ 378, 380(CCPA 1960).

3. Claims 7, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent NO.5681279 to Roper et al as applied to claim 1 above, and further in view of US Patent NO. 6139530 to Hiegima et al or U S Patent No.5643206 to Fischer.

As mentioned above Roper teaches the invention except for the barrel having a hole.

Both Fischer and Hiegima teach a syringe having a barrel with a hole.

Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to have combined the above art because according to Fischer the hole in the barrel accommodate a particular volume of material desired to be mixed and dispensed.

Allowable Subject Matter

4. Claims 8 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
